Ndaru L Santosa

WEB DEVELOPER & FULL STACK ENGINEER

Full-stack developer with a designer's eye for detail. I build scalable, performant web applications—from database architecture and REST APIs to responsive frontends. Strong in PHP/CodeIgniter ecosystems, with solid experience in JavaScript, MySQL, and modern UI frameworks. I write clean, maintainable code and care deeply about user experience.

EXPERIENCE

SDN Sunter Agung 12 PG

DEC 2025 — JAN 2026

Web Developer • Contract

Engineered Sadulas, a full-stack school information system using CodeIgniter 4, PHP, and MySQL. Designed relational database schemas for student records (Klapper) and digital letter management. Built a secure admin dashboard with role-based access, dynamic content modules, and SEO-optimized public portal. Deployed to production with Niagahoster and implemented caching via .htaccess.

PT. Bhinneka Alam Nusantara

SEP 2022 — OCT 2024

UI/UX Designer • Full-time

Collaborated with engineering teams to build scalable Design Systems and interactive prototypes for SIALAM mobile app. Ensured design-to-code fidelity through detailed design handoff docs and Design QA. Improved task completion by 25% via iterative usability testing and component-based UI refactoring.

PT. Solvera Global Teknologi

OCT 2025 — DEC 2025

UI/UX Designer • Full-time

Revamped solvera.id corporate website with a modern responsive design system. Delivered pixel-perfect Figma-to-code specifications and style guides. Optimized information architecture and mobile responsiveness to enhance site performance and user engagement.

Crooked Indonesia

MAR 2022 — AUG 2022

Web Developer • Internship

Developed a responsive e-catalog website using PHP (CodeIgniter) and Bootstrap. Built relational database schemas and server-side logic for dynamic product filtering and inventory management. Synchronized frontend data structures with backend APIs and maintained zero critical downtime.

SELECTED PROJECTS

Sadulas

School Information System • Fullstack

Built an integrated SIS with public portal and secure admin dashboard. Implemented MVC architecture, relational database design, authentication, and SEO optimization. Reduced administrative workload through digital letter processing and automated student record tracking.

CodeIgniter 4

PHP

MySQL

Tailwind

JavaScript

Omhut Parkopi

Self-Service Web App • Fullstack

Transformed manual coffee shop ordering into a digital self-service kiosk. Built real-time shopping cart logic with AJAX, order status tracking, and stock synchronization. Developed a comprehensive admin dashboard for inventory and sales management.
