EDUCATION

University
Esa Unggul University
S1 Information Systems
GPA: 3.56 / 4.00
2019 - 2024

SKILLS

UX Research & Design

- User Research / Interview
- Usability Testing
- Design Systems
- Figma & Prototyping
- Wireframing

Web Development

- HTML5 / CSS3 / JS
- CodeIgniter 4 (PHP)
- Bootstrap / Tailwind
- MySQL Database
- Git / Version Control

Professional Summary

Professional Summary

I love digging into tough user problems with solid research and real data, and because I’ve been full-stack myself, I can design beautiful, intuitive interfaces that actually make sense to build—clean handoffs, scalable systems, and way faster delivery for the whole team.

Work Experience

Sep 2022 - Oct 2024 Tangerang
UI/UX Designer
PT. Bhinneka Alam Nusantara

- **Initiation Phase:** Collaborated with Product Owners for requirement gathering and established a **Mobile Design Pattern** to ensure consistency across High-Fidelity Prototypes.
- **Web Expansion**: Designed the SIALAM **Web Landing Page** and produced comprehensive Application Flow documentation for smooth developer handoff and Design QA.
- **Optimization:** Led the long-term scalability of the **Design System** and executed product redesigns based on **user feedback loops**, significantly improving usability.

Mar 2022 - Aug 2022 Tangerang
Web Developer
Crooked Indonesia (Internship)

- **Backend Operations:** Architected server logic and optimized database structures to support efficient management of 500+ product SKUs.
- **Frontend Integration:** Collaborated with the frontend team to integrate **API endpoints** with the user interface, ensuring seamless data binding.
- **System Maintenance:** Ensured server stability and maintained system performance with **zero critical downtime** throughout the 6-month contract.

Featured Projects

F&B Self-Service App (Om Hut Parkopi)

Role: Product Designer & Full Stack Developer

[Research] Analyzed ordering bottlenecks and designed a self-service flow that cut customer queue time by approx. **30%** during peak hours.

[Development] Engineered the kiosk system using **CodeIgniter 4** and **MySQL**, handling real-time orders with sub-second data synchronization.

[Impact] Created a "Zero-Training" interface, achieving **100% adoption rate** by customers without staff assistance.

View Repository

Konter Print Helper (Flutter OCR App)

Role: Mobile Developer & UI/UX Designer

[UX Solution] Analyzed the inefficient "screenshot-to-print" workflow and designed a **Direct Share** flow that reduces the printing process from 5 steps to just 1 click.

[Development] Built a **Flutter** application integrating **Google ML Kit** for high-accuracy OCR and **Android Method Channels** to bridge E-Wallets with Bluetooth thermal printers.

[Impact] Solved the "blurry text" issue and minimized paper waste by auto-formatting receipts specifically for 58mm thermal layout.
